

## Green Power getreidefrei

### Pašarai varžyboms

### Feed supplement for horses

The optimal protein and energy ratio, as well as the high vitamin content, ensure an excellent level of performance and an effective muscle development. Due to the high proportion of structure, the feed is consumed slowly, mastication is stimulated, and the feed is therefore well insalivated. Milk thistle oil and rice bran stimulate the metabolism and supply energy without burdening the delicate protein balance. Sunflower seeds provide structurally bound vegetable oils, lecithin and secondary plant substances. Green Power is therefore particularly rich in physiologically valuable, polyunsaturated omega-3 and omega-6 fatty acids. The feed is finely balanced with vitamins, minerals and trace elements in such a way that the daily ration is completely balanced with feeds of 1 kilo and more per day.

The benefits at a glance:

- starch and sugar reduced
- with increased energy content
- the high structural content increases mastication and saliva production, and improves the gastrointestinal environment
- may support muscle development
- rich in polyunsaturated omega-3 and omega-6 fatty acids
